**C**ris Pharma (India) Limited was established by a renowned technocrat Vinod Kalani (a pharmacy graduate from BITS Pilani) in the year 1992, having its corporate office at Jaipur, India.

The manufacturing plant of Cris is operational from June 2006 with a state-of-the-art WHO GMP certified manufacturing facility at SEZ, Dehradun, Uttarakhand, India and is fully equipped to manufacture pharmaceutical formulations - tablets, liquid orals and capsules conforming to the highest level of quality. The plant also has ISO 9001:2008 Certified quality management system.

Cris is currently marketing its range of formulations in 16 states in India and is also engaged in contract manufacturing on P2P and Loan License basis for organized pharma companies of repute and also has its marketing operations in overseas markets.

## Management and the team

The corporate affairs are being managed by two full time highly experienced professional directors based at Jaipur, India. The manufacturing facility is managed by two full time directors of the company (one technical and another executive) based at Dehradun.

The export division of the company is managed by experienced and qualified professionals competent to handle business at global level in a very transparent and dedicated manner. The management has a healthy mix of experienced professionals dedicated to accomplish the goals of the organization.

The strength of our organization is our highly committed team of technocrats that gives the same professional attention to all the projects. Through personal commitments, our company achieves a very high level of reliability.

## Contract manufacturing

The company specializes in contract manufacturing and is currently manufacturing for many reputed pharma companies, with growing product offering and clientele. Cris has been a reliable and trusted partner of the healthcare industries with a history of proven regulatory compliance.

We currently manufacture products on contract basis at our facility for various leading pharmaceutical companies both for the Domestic as well as Export markets.

The quality service delivered by Cris is one major reason that pharmaceutical companies opt to entrust manufacturing of their products with us. Our systems promote consistent quality in production while maintaining cost efficiencies. Our expertise in contract manufacturing has won us appreciation across the country and has helped us maintain a clientele that is satisfied with our value based quality services.

## Quality assurance

Cris has got special focus on day-to-day quality assurance activities. There is a highly motivated team of experienced quality assurance personnel headed by a knowledgeable, dedicated professional.

The retention period of technocrats at our organization is very high as compared to normal industry standards. This enables us to develop and maintain the consistency in our quality systems in a very effective and efficient manner.

We work on the concept of Quality by Design (QbD) and constantly upgrade our systems that are mostly automated.

## Quality control

The quality control department is being headed by a very experienced and knowledgeable person in the field of analysis who is associated with our group for last 25 years.

We focus on all aspects of quality management including quality assurance, quality control and systems based working. The quality control lab has separate sections, physico-chemical test section, instrumental section, microbiological section, packaging material testing section, a well stocked reference library. The lab is well equipped with sophisticated instruments including HPLC, GLC, FTIR, Atomic Absorption and UV Spectrophotometer etc.

The name of Cris is associated with Quality because of our strong QC department and accuracy and consistency of the analytical results.

## Automation at Cris

Cris uses Enterprise Resource Planning software package – CrisCon Pharma ERP that is specially designed for automation in pharmaceutical manufacturing units. This software package including eBR helps attain compliance with cGMP. Besides covering many important activities, CrisCon helps to maintain entire documentation, in time, as per the requirements of WHO GMP. The Cris is, thus, always in a state of compliance with the regulatory requirements.

Our QC Laboratory is automated and we have deployed OasisLIMS (Laboratory Information Management System) in place to remain in compliance with US FDA 21 CFR part 11, GLP requirements.

The formulation development activities are automated through a specially designed software LIMZ-RD.

The data management is very effective due to automation of various activities.

## Formulation research and development, stability studies, validation studies, new method development

Periodic and accelerated stability studies and validation studies and new method development are conducted in-house.

This is a continuous in-house activity at Cris. Latest formulations and new techniques including direct compression, aqueous coating, enteric coating, etc. are used to manufacture modified release/sustained release formulations, dispersible, bi-layer tablets etc.

## Exports

Besides providing contract manufacturing services to many leading Indian MNCs to meet their domestic and export market requirements, Cris has pierced into international Pharmaceutical Market.

Cris has recently started its export operations in Nigeria, Vietnam, Myanmar, Ghana, Ethiopia, Liberia, Haiti, Kenya, Sri-Lanka & Uganda. Its manufacturing unit is also registered in Francophone countries.

Cris has full-fledged team of professionals for International business and regulatory affairs, to prepare and submit dossiers as per CTD, ACTD and follow the guidelines of MOH of different countries. Cris is now poised to become a leading exporter of Drugs and Medicines from India and is all set to commence business in abroad.
